Skills

I am a trained web designer and developer. My education was mostly focused on the design side of things, but I've also picked up some skills in frontend development.

HTML	Microsoft Office
CSS/Sass	Visual Studio Code
JavaScript	Adobe Illustrator
jQuery	Adobe PhotoShop
React.js	UI/UX Design
Node.js	UX Research
anime.js	Heuristics
webpack.js	Wireframes
PHP	User personae
WordPress	Cusotmer service
SquareSpace	Instruction

Education

Seattle Central College
2019-2021

Associate's of Applied
Science - Web Design
Dean's List 2020-21
President's List 2020-21

South Seattle College
2010-2011

Associate's of Arts -
Philosophy

Experience

Web Designer - Freelance

March 2020 - Present

I have completed several web design projects for different clients, mostly local businesses and non-profits. The work included:

- Creating custom websites with WordPress and SquareSpace
- Writing project proposals and presenting them to clients.
- Creating web design documents, including wireframes, mock-ups, user personae, heuristic analysis, and competitive research.
- Creating and managing databases.
- Assisting clients with hosting and bringing the websites live.
- Writing documentation for general use and upkeep, for both WordPress and SquareSpace sites.
- Creating a custom CMS with PHP.
- Writing HTML, CSS, PHP, and JavaScript code.
- Remote meetings over Zoom and email corresponsance.

Sales Agent - Tim Robinson Artist

November 2014 - February 2020

This was a job at a craft stall at the historic Pike Place Market. Though less technical, it taught me important skills. The work included:

- Working independently on a daily basis, without supervision.
- Interacting directly with customers and negotiating prices.
- Managing money and inventory.
- Following Pike Place Market rules and regulations, and maintaining good relations with fellow vendors
